PROFESSIONAL SUMMARY

Frontend Engineer who enjoys building responsive, data-driven web applications with React, Next.js, TypeScript, and TailwindCSS. Comfortable working with API integration, state management using Zustand, and turning design mockups into production-ready, mobile-optimized interfaces. I've built interactive dashboards with dynamic data rendering, charting components, and real-time UI updates, and I work well in cross-functional teams that move fast with Git and agile workflows. Looking to bring these skills to a mission-driven team where good engineering makes a real difference.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript (ES6+), TypeScript, React.js, Next.js, HTML5, CSS3, TailwindCSS, Framer Motion

Data Visualization: Recharts

State & Data: Zustand, REST API integration, Axios, JWT authentication, role-based access control, dynamic data rendering

Tools & Workflows: Git, GitHub, Vercel, Figma, agile development workflows

WORK EXPERIENCE

IT Support Analyst (NYSC)

BDO Professional Services, Lagos, Nigeria | Jun 2025 – Feb 2026

- Collaborated with cross-functional teams to troubleshoot and resolve technical issues, strengthening communication and attention to detail in a structured enterprise environment.
- Maintained internal technical documentation and supported operational workflows, demonstrating accountability and precision aligned with agile team practices.

Software Development Intern

CapitalSage Technologies, Ibadan, Nigeria | Jan 2023 – Jul 2023

- Engineered Kolomoni Gambia's full marketing website from scratch using HTML5, CSS3, and JavaScript, delivering a multi-page responsive interface spanning 6+ pages covering Digital Banking, Agency Banking, Remittances, and Loans.
- Built modular, reusable UI components with cross-browser compatibility across desktop and mobile, ensuring accessible, fast, and mobile-optimized delivery.
- Integrated third-party APIs including Google Forms and mobile app store deep links, handling dynamic data rendering across external platforms.
- Translated design mockups and stakeholder requirements into production-ready code, establishing the company's first digital presence in the Gambian market.

PROJECTS

Saint Valor | E-Commerce Jewelry Platform

Next.js, TypeScript, TailwindCSS, Axios, Zustand, Recharts

- Building a full-stack e-commerce platform with a customer-facing storefront and a comprehensive admin dashboard featuring interactive data visualizations, order tracking charts, and real-time data tables.
- Implemented end-to-end JWT authentication with protected routes, role-based access control, and Next.js middleware, ensuring a secure, scalable architecture across 15+ routes.
- Integrated Axios-based API communication with a live backend, managing authentication tokens, async data flows, dynamic data rendering, and error states.
- Adopted Zustand for global state management, enabling clean, predictable data flow with optimistic UI updates and zero unnecessary re-renders.
- Engineered 30+ modular, reusable components, from a multi-step customization form to filterable admin tables, with consistent focus on performance optimization and accessibility.

AMSAfrica | Pan-African Academic Platform

Next.js, TypeScript, TailwindCSS

- Designed and deployed a multi-page platform for a pan-African organization operating across 10+ countries, with dynamic routing, optimized images, and responsive navigation.
 - Ensured cross-platform accessibility and mobile optimization across desktops, tablets, and smartphones with strong emphasis on performance and consistency.
-

EDUCATION

Bachelor of Science (B.Sc.), Computer Science | CGPA: 3.88 / 5.0

Babcock University
